Game Description

Fortune Fortress® is a dynamic 5-reel game with the potential to expand to 6 rows, therefore creating more opportunities to win. In this game, payouts are awarded based on active win lines from the left-hand reel, with only the highest win per line recognized.

The Lock and Respin Feature is triggered by 5 Scatters during the base game, which in turn awards 3 Free Spins. Each spin during this feature locks coins in place, potentially revealing hidden prizes and resetting spins back to 3. This feature continues until all spins are used or the reels are filled.

Fortune Fortress offers the chance to win Fixed Jackpots, which include the Lock and Spin Mini, Minor, Major, and Grand Jackpots. To unlock these jackpots, a defined number of coins must be locked in place.

A Bonus Buy will be available (where allowed) to buy straight into the bonus round.

Feature

Features for this game include Locking win respin, Jackpots, tap chest Jackpots and Fortress Hold n' Win.

Locking Win Respins:

Symbols that create a new or add to existing winning combinations lock and all other symbols respin. Each respin expands the reels and adds more paylines.

After 2 respins or no new wins, resulting combinations are paid.

Treasure Chest scatters also lock during respins.

Tap Chest Jackpot:

When the player expands the reels to full, coins are added to a chest. Coins award a random chance to trigger the Tap Chest Jackpot feature. There is an equal chance to trigger every time the coins are added to the chest. Once the feature is triggered, the player is guaranteed to win one of the Jackpots. They must tap on the chest until the feature ends to reveal their prize.

Jackpot:

There are four fixed jackpots to be won. There two ways to win them, one via the Tap Chest feature, and the other via the Hold n' Win feature.

Fortress Hold n' win:

5 or more treasure scatters start the bonus, 3 free spins are awarded. New chest landing reveals a prize, lock and reset spin to 3. Jackpots are unlocked by collecting chests. Only the highest jackpot unlocked will be awarded. Features end when no spins remain, or reels are full. Total won is the sum of the Chests plus the highest jackpot unlocked.

General Information

Random Game Play

This game is totally random; the odds of getting any particular outcome are always the same and are not based on any other factors or prior outcomes e.g. stake value, previous wins or losses, time of day, account balance, etc.

Return to Player Percentage

The expected return to player (RTP) reflects the theoretical return over a large number of plays. The RTP is expressed as the percentage returned to players in winnings of the total amount staked, e.g. if £1,000,000 was staked and £960,000 was returned, the RTP of the game for that period of play would be 96%.

The actual RTP during a playing session can vary widely, in either direction, from the theoretical return.
